

We specialise in supporting laboratory testing functions within the pharmaceutical, biotechnology and healthcare industries. Our experience includes over 23 years working in regulated laboratory environments satisfying both MHRA and FDA requirements.

We offer the services listed below for general laboratory support;

- Development of ICH validation protocols
- Laboratory evaluation and efficiency review
- COSHH, fire & risk assessments
- Facilities expansion management
- Laboratory restructuring
- Management & troubleshooting
- Coaching and mentoring of laboratory staff
- Chemical and consumable purchase negotiations
- Third party outsourcing & negotiations
- Reference Standard manufacture and supply
- We are also able to offer customised training courses for all aspects of the above services.

If you are interested in a service and do not see it listed then please [contact us](#) for further information.
