

DMB Consultancy can help manage all aspects of your requirements for clinical trial packaging, storage and distribution.

We have excellent knowledge of the service providers within the UK and the USA and design and assist with all aspects of the process.

We can help with all aspects of a study including:

- Selection of vendors / contractors
- Auditing of facilities as required for GMP compliance
- Patient pack design
- Advice on the best way to manage the logistics of a clinical trial
- We are also able to provide QP advice and review of documentation and subject to licence requirements release the clinical trial materials for use in a study.
